

ABSTRACT

There is provided a settlement system comprising
a mobile communication terminal, a settlement input
5 device configured to output data of a charge, and a
settlement device able to transfer money from a first
account to a second account. The settlement input device
comprises a first transmission unit configured to
transmit the data of the charge to the mobile
10 communication terminal, and a second transmission unit
configured to transmit the data of the charge,
identification data of the mobile communication terminal,
and identification data of the settlement input device to
the settlement device. The settlement device comprises a
15 control unit configured to transfer an amount of money
determined by the data of the charge from the first
account to the second account, and a transmission unit
configured to transmit the data of the amount of the
transferred money to the mobile communication terminal.
20 The mobile communication terminal comprises a first
reception unit configured to receive the data of the
charge from the settlement input device, a second
reception unit configured to receive the data of the
amount of the transferred money from the settlement
25 device, and a display.
